

ADB - CoRE Vaccine Seminar

Fit-for-Purpose

Vaccine Technologies:

The Amalgamation of

Science, Policy and Practice

05 - 07 Oct 2023

Duke-NUS Medical School

Amphitheatre, Level 2,

8 College Road, Singapore 169857

ABOUT THE SEMINAR

COVID-19 demonstrated strengths and weaknesses of the global community. While international efforts led to safe and efficacious delivery of COVID-19 vaccines, more must be done to address inequitable vaccine access and fragmented regulatory systems. There is a clear correlation between production capacity, regional access to vaccines and vaccine administration rates.

ABOUT ADB

The Asian Development Bank (ADB) envisions a prosperous, inclusive, resilient, and sustainable Asia and the Pacific, while sustaining its efforts to eradicate extreme poverty in the region.

ADB assists its members, and partners, by providing loans, technical assistance, grants, and equity investments to promote social and economic development.

ADB maximizes the development impact of its assistance by facilitating policy dialogues, providing advisory services, and mobilizing financial resources through cofinancing operations that tap official, commercial, and export credit sources.

For more information, please visit:
<https://www.adb.org/>

ABOUT CoRE

CoRE focuses on three key approaches to fulfil its vision. One area focuses on education and capacity building, the second area convenes think tank activities to promote policy innovation and thought leadership in new and challenging issues in regulatory science, and the third area is centered on leveraging the Centre's expertise and networks to provide strategic and technical advice to support stakeholders.

Education

Enhance capabilities and competencies of regulatory professionals

Think Tank

Promote thought leadership and policy innovation

Advisory

Leverage expertise and networks to support stakeholders

ABOUT DUKE-NUS MEDICAL SCHOOL

Duke-NUS is Singapore's flagship graduate entry medical school, established in 2005 with a strategic, government-led partnership between two world-class institutions: Duke University School of Medicine and the National University of Singapore (NUS).

ABOUT CORE

The Centre of Regulatory Excellence (CoRE) was established to facilitate access to safe, high quality and effective medicines and medical devices through the strengthening of health product regulatory systems in the Asia-Pacific, with a special focus on South-East Asia. Guided by this theme, CoRE contributes to improving patient access to health products and also enhancing regional health systems and health security.
