Converging Health Products & Services Regulation for Access, Innovation & Sustainability

# **Sponsorship Brochure**

### 14 – 15 October 2024

Ngee Ann Kongsi Auditorium, Academia, 20 College Road, Singapore 169856

#### Dear Valued Partners,

The Duke-NUS Centre of Regulatory Excellence (CoRE) is honoured to celebrate our tenth anniversary this year with you!

Established in November 2014 at the Duke-NUS Medical School in Singapore, CoRE is a unique centre, with a commitment to enhancing regulatory capabilities and scientific excellence in health products and systems across Asia and the Pacific. The key thread in our initiatives over the past years has been "Enabling Regulatory Excellence, Improving Lives."

As CoRE enters its next phase, we are defining how the future of health can be better regulated. In the changing landscape of health regulation, we see the greater converging of health products and health services regulation to strengthen overall national health systems resilience and enhance timely access by patients to appropriate innovative therapies.

In marking our 10<sup>th</sup> Anniversary milestone, we look towards emerging issues on the horizon and are excited to present our Scientific Conference on 14 and 15 October 2024 - "*Regulating the Future of Health: Converging Health Products & Services Regulation for Access, Innovation & Sustainability*".

Reflecting on our expanded scope, the Conference addresses four pivotal and pertinent themes – (a) Regulating Artificial Intelligence & Digital Health, (b) Regulating Precision Medicine, (c) Regulating for Disease Prevention, and (d) Partnerships for Effective Regulation.

Convening international experts, thought leaders, policymakers, regulators, industry innovators and patient representatives, we envision this Conference as a platform for key decision makers and stakeholders in the regulatory ecosystem to connect, engage, network, and be furthered empowered.

As a sponsor, you can position yourself as an industry thought leader and showcase your expertise. We welcome you to <u>connect with our Strategy & Business Excellence Lead</u> to explore the available sponsorship packages. We look forward to your support and participation in this significant event.

Warmest Regards,

Prof John Lim Executive Director CoRE

Prof Silke Vogel Deputy Director CoRE

CoRE's Scientific Conference is the highlight of the Centre's wide-ranging think-tank and education initiatives and is the must attend CoRE signature event of the year. Building on the success of past CoRE Scientific Conferences, **the 10**<sup>th</sup> **Year Anniversary conference** is a unique opportunity for professionals, policymakers, and thought leaders in MedTech and Pharma, and Healthcare to collectively address urgent regulatory challenges.

From emerging AI technologies to evolving healthcare policies, this distinctive Conference addresses an expansive spectrum of health regulation topics with contemporary relevance and global reach. With a diverse range of insights and expertise garnered from international and regional contexts, the programme offers a platform to shape perspectives, foster dialogues, and advance networking and collaboration.

# **CONFERENCE OBJECTIVES**

- **1** Create a platform for comprehensive discussions and the exchange of knowledge pertaining to exciting themes.
- Promote collaboration and convergence among regulatory authorities, healthcare providers, and innovators to ensure that regulations keep pace with technological advancements.
- 3 Share insights, best practices, and case studies to inspire innovative approaches to health regulation, access, and sustainability.

### **CONFERENCE THEMES**

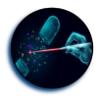

To address the converging of health products and health services regulation, and assess future implications on therapeutics development, health systems, patient access, and new regulatory framework co-creation, the Conference comprises four exciting sessions:

### **REGULATING ARTIFICIAL INTELLIGENCE (AI) AND DIGITAL HEALTH**

Artificial Intelligence (AI) has emerged as a game-changer in the healthcare sector. AI-driven technologies are redefining diagnosis, treatment, drug discovery, and the overall patient care landscape. This transformative environment requires robust regulation to ensure safety, ethics, and responsible innovation, but numerous issues need to be resolved in a nascent, diverse global regulatory landscape.

### **REGULATING PRECISION MEDICINE**

The realms of Precision Medicine hold immense promise for personalizing healthcare and enhancing patient outcomes. From wearable devices to genomics, these technologies are reshaping healthcare delivery. Regulatory frameworks must evolve in parallel with these advancements, and regulators and policy makers must enhance capacity building and coordination.

### **REGULATING FOR DISEASE PREVENTION**

At the core of public health efforts lies the crucial principle of disease prevention, a cornerstone of promoting well-being and longevity in populations. Regulatory measures serve as the backbone of these prevention strategies, providing evidence-based frameworks and guidelines necessary to create a healthier environment for everyone.

### PARTNERSHIPS FOR EFFECTIVE REGULATION

Stakeholder partnerships and consumer education are vital for effective regulation. Engaging industry representatives, advocacy groups, and experts ensures diverse perspectives inform regulation, leading to balanced outcomes. Educating consumers about regulations promotes compliance, understanding of rights and responsibilities, fostering trust in regulatory frameworks and empowering informed decision-making.

#### **About CoRE**

The Centre of Regulatory Excellence (CoRE) was established to facilitate access to safe, high quality and effective medicines and medical devices through the strengthening of health product regulatory systems in the Asia-Pacific, with a special focus on South-East Asia. Guided by this theme, CoRE contributes to improving patient access to health products and also enhancing regional health systems and health security.
